Manager's Welcome

It has been a great year for FAST and I am excited to introduce this format to share our programs and updates with you. This newsletter will introduce you to NextBus, FAST's new service that lets you know when your bus will arrive at your stop. Our service schedule update for January 2017 will improve our service reliability and make your trip more predictable. And many people are curious about our Parking Fee Program, what it will look like and when it will start. This newsletter will cover these topics and more.

We are excited to share our new technologies, service improvements, and efforts to make your trip as safe and convenient as possible. I hope that with future newsletters we can continue to keep you informed and excited about the services that we provide, and the positive impact we have on our community. Have a safe and happy new year.

Most sincerely,

Nathaniel Atherstone,
FAST Transportation Manager

January 9 Service Changes for Routes 30, 40, & 90

Departure times are updated to align with the actual route times. Morning commute times for some routes will be a little earlier to match planned arrival times at BART stations and downtown Sacramento. Afternoon buses in Sacramento have been adjusted to be more reliable. Visit fastransit.org and view posted notices for detailed schedule information. Updated brochures available today.

NextBus Real-Time Passenger Information. Making Transit Easy.

FAST is now using NextBus technology!

You can now check on your FAST bus in real-time on your smartphone, tablet, or computer. Get transit information whenever, wherever, and however you want by downloading the NextBus application today (available free on the Apple Store and Google Play).

NextBus uses GPS technology to track our buses and predict their arrival time for every stop we serve. By taking into account the live position of the vehicle, the intended stops, and updated traffic patterns, NextBus can estimate the arrival time with a high degree of accuracy. Arrival times are constantly refreshed to provide riders with up-to-the-minute information. Look for new digital displays at the Fairfield Transportation Center in early 2017, which will also share minute by minute arrival times for each route. Customers can also text NextBus directly to receive arrival information for all buses at each bus stop and subscribe to receive messages for future route information.

For questions on NextBus, or any other transit services, please call FAST Administration at 707-434-3800 or visit us online at fasttransit.org

Parking Fee Program Update

The Parking Fee Program at the Fairfield Transportation Center is still in the pre-construction phase, but here is a quick update on what you can expect:

We anticipate that the construction phase will begin spring 2017 with the installation of parking gates, vending machines, signs, and new parking lot paint. We will test out the parking equipment for at least 30 days to ensure that the programs, fee collection systems, and equipment are functioning. During the testing period we will open the application process for monthly passes in the parking garage.

The adopted parking fee is \$30 per month for parking in the garage or \$1.50 per day for first-come, first-served parking in the surface lot. City staff will notify our customers when the construction is complete for the opening of the monthly pass applications. Keep an eye out for updates online at fasttransit.org.
